SELECT EXPERIENCE

Slalom \_build - Senior Engineer

11/2023 - 8/2024

- Worked closely with project architect and principal engineer to redesign front end architecture for migration to graphql, improvements in testing capabilities, and tech debt reduction.
- From figma design to implentation, built messaging platform for claimant attorneys to communicate with insurance policy reviewers.

Slalom - Consultant

10/2021 - 11/2023

- Designed and implemented a system for dynamically displaying questions for healthcare provider visits depending on the patient's selected visit type.
- Helped implement a caching mechanism to increase performance of extremely slow calls to a third party system.
- Refactored extensive portions of front end logic to remove React anti-patterns, break monolithic files into smaller more readable files, and general cleanup of code.
